Multi-Agent Framework for Claude Code

justship

From ticket to ship. Autonomously.

A portable multi-agent framework for autonomous software development. Ship complex projects from ticket to ship — fully autonomous.

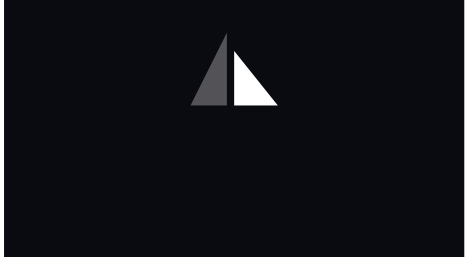
Brand Identity Guide · v1.0 · March 2026

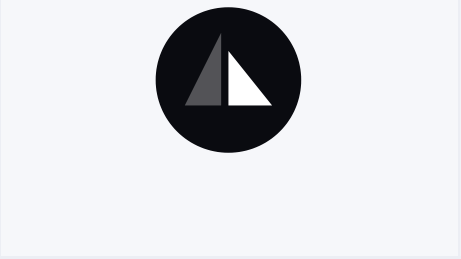
01

Logo mark

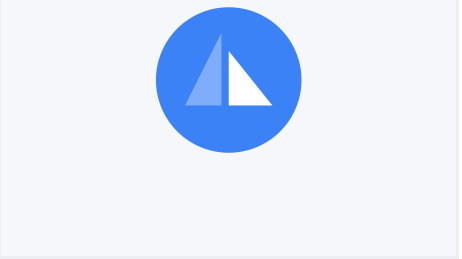
Twin sails inside a circular container. The front sail is solid, the back sail ghost-transparent — creating depth and wind-filled motion.



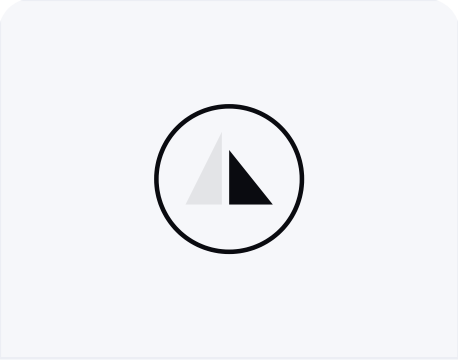
Primary — dark bg



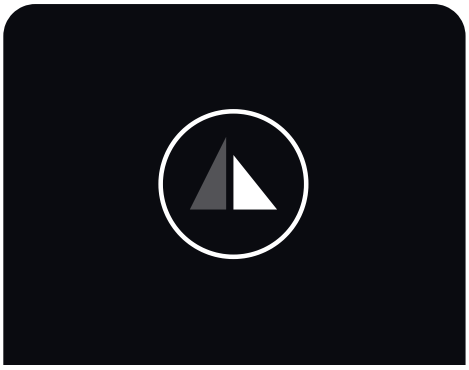
Primary — light bg



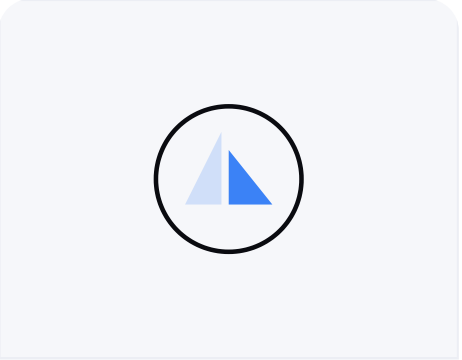
Accent — brand blue



Outline — mono light



Outline — mono dark



Outline — blue sails

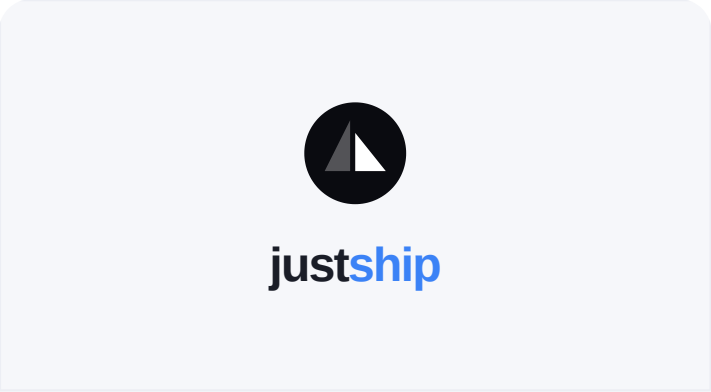
02

Logo + wordmark

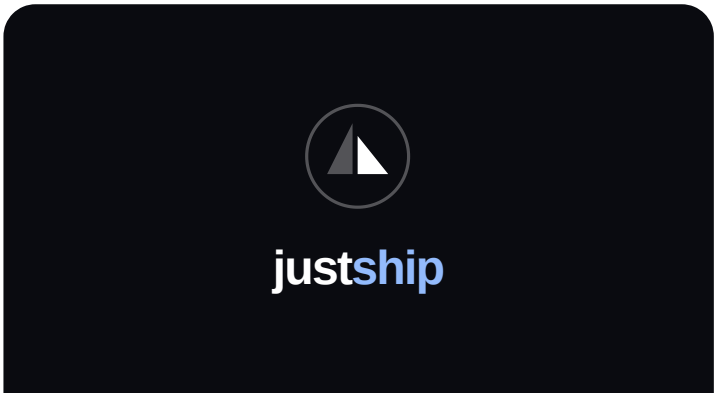
Sora ExtraBold (800). "just" in neutral, "ship" in accent blue. Minimum clear space around mark: half the mark width.

Horizontal — light

Horizontal — dark



Stacked — light

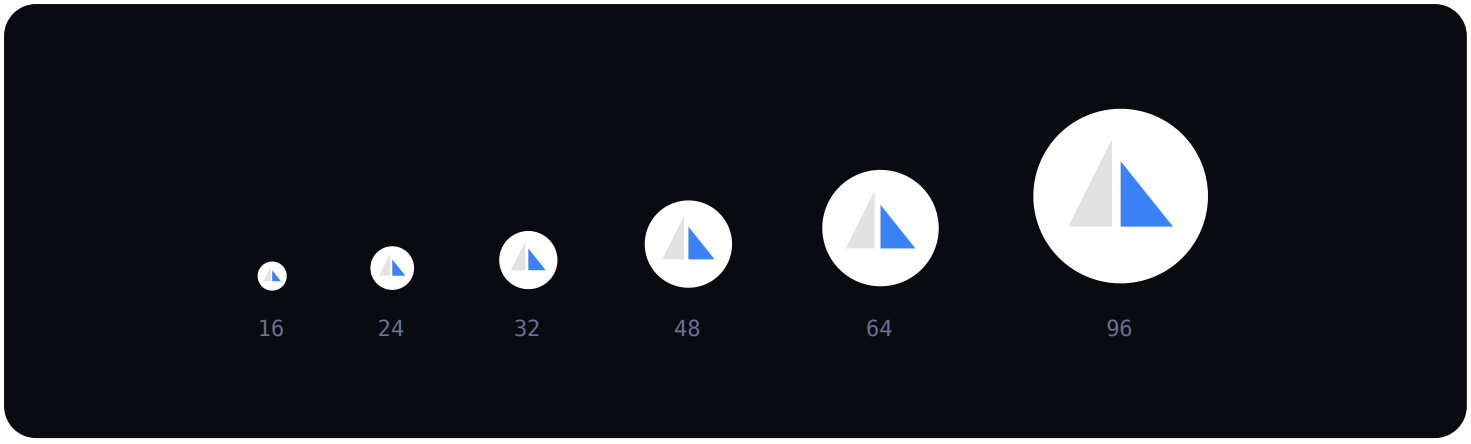


Stacked — dark

03

Sizing

Scales cleanly from 16px favicon to hero size. At small sizes the ghost sail naturally blends — this is expected.



04

Color palette

Cool-toned neutrals with a blue undertone. One accent blue. Semantic colors for status and feedback.

NEUTRALS

950	#0a0b10
900	#1a1d27
800	#2a2e3b
700	#3d4255

05

Typography

Sora for all UI and marketing text. JetBrains Mono for code, data, and technical elements.

Sora 800 · Display · -0.04em

Ship tickets, not excuses.

Sora 600 · Heading · -0.03em

Autonomous development from ticket to pull request

Sora 400 · Body · 16px · 1.65 line-height

Write a ticket. Watch it turn into a pull request — autonomously. Just Ship connects your task board to an AI agent pipeline that plans, implements, and ships code while you focus on what matters.

JetBrains Mono 400 · Code · 14px

```
npx just-ship init
```

06

UI components

Buttons, badges, and navigation patterns used across the product and marketing site.
